Events – Lunch & Learn Webinars

Wednesday, September 14, 2016, noon – 1:00 PM

Topic/Theme: EHR Conversion and Data Storage Best Practices

Presented by: Jamie Steck, Business Development Manager, EHR Integration

Description: So, you have made the decision to move to a new EHR, and the dilemma is facing you… "What do we do with our current EHR Data? Do we convert it? Or do we store it?" "What if groups are joining with us and they have to deal with their data? What do we do with it?" Join us for this webinar to discuss ways to convert and store EHR system data.

Learning Objectives:

- Learn best practices on how to convert EHR System data from existing EHR's to a new system.
- Learn new ways to store EHR data and make it available inside your current or existing EHR.
- Learn how to take data from your existing EHR and make it available and usable from your current EHR.
- Learn about Continuity of care strategies for before during and after the conversions

Events – Lunch & Learn Webinars

Wednesday, October 12, 2016, noon – 1:00 PM

Topic/Theme: Ohio-The Next Generation Data Sharing Network. From Results Delivery to Translational Research

Presented by: Dave Billiter, COO
Signet Accel

Description: The presentation will provide an introduction to Signet Accel and the Avec Platform. It will also enable an understanding of a federated approach to data sharing to support Clinical and Translational Medicine. The talk will include real-world examples of the Avec Platform in use to support the topic area. The presentation will also provide a vision for the State of Ohio for data sharing.

Events – Lunch & Learn Webinars

Wednesday, December 7, 2016, noon – 1:00 PM

Topic/Theme: How can we enhance our end users experience?|
A pragmatic approach to improving provider & clinical end user log on times.

Presented by: John Flamand
Manager-Systems and Operations Management and Compliance (SOMC) practice
Lochbridge

Description
A large not for profit multi-hospital health system wanted to identify ways to enhance their end user (provider) experience. They suspected issues with extended log on times for their providers, clinical end users and general users. Knowing they had good people who manage their infrastructure i.e. server, network, storage, MVD & desktop engineering e.g. They also realized their infrastructure teams operated in silos and many of the issues involved multiple infrastructure teams. The Health System required identification of bottlenecks across their infrastructure silos.
