Events – Lunch & Learn Webinars

Wednesday, December 7, 2016, noon – 1:00 PM

Topic/Theme: How can we enhance our end users experience?
A pragmatic approach to improving provider & clinical end user log on times.

Presented by: John Flamand

Manager-Systems and Operations Management and Compliance (SOMC) practice
Lochbridge

Description

A large not for profit multi-hospital health system wanted to identify ways to enhance their end user (provider) experience. They suspected issues with extended log on times for their providers, clinical end users and general users. Knowing they had good people who manage their infrastructure i.e. server, network, storage, MVD & desktop engineering e.g. They also realized their infrastructure teams operated in silos and many of the issues involved multiple infrastructure teams. The Health System required identification of bottlenecks across their infrastructure silos.
