STATE OF OHIO

Executive Department

OFFICE OF THE GOVERNOR

Columbus

RESOLUTION

WHEREAS, it is important to highlight the critical importance of secure and efficient information systems to improving the delivery of health care in Ohio; and

WHEREAS, information technology and management systems can be used to supply quality jobs, improve health care delivery, enabling coordination between providers and patients, improve patient safety and transform health care for all Ohioans; and

WHEREAS, health information technology connects doctors and patients to more complete and accurate health records; and

WHEREAS, everyone can play a role in improving our health care system and an important part of this vision is recognizing the pivotal role patients play in maintaining and improving their own health; and

WHEREAS, tools like electronic health records and electronic prescriptions help patients and providers make safer, smarter decisions about health care; and

WHEREAS, better technology can also cut costs for providers by reducing paperwork and duplicative tests; and

WHEREAS, Ohio is proud to honor the commitment and service of the clinicians, information technology executives, directors and managers who work in the state's health care provider institutions, payer organizations, the military and other branches of government, academic centers, and supplier and consulting companies.

NOW, THEREFORE, I, John R. Kasich, Governor of the State of Ohio, do hereby designate April 3, 2014 as

OHIO HEALTHCARE INFORMATION TECHNOLOGY DAY

throughout Ohio and urge all Ohioans to recognize all those who are dedicated to improving health care for all.

On this 3rd day of April, 2014;

John R. Kasich
Governor

OHIT Day Policy Asks

- Support the further use of Telehealth technology to improve the delivery of healthcare for Ohioans.

- Support health IT funding in your future budget considerations even though budget deficit conditions will need to be resolved.

- Support policies to increase health Information exchange in Ohio consistent with national standards and help supply funding as needed.

- Support the funding of health IT workforce development programs that are needed to implement the health IT objectives in Ohio.

- Support coordination of care through a technologically integrated healthcare community, including the healthcare consumer, caregivers, and payers as partners.
