

Inpatient Case Study

Jessica Ginn

Mercy Health CarePATH Application Coordinator

Our Footprint

- Mercy Health is a Catholic healthcare ministry serving Ohio and Kentucky.
- Mercy Health is one ministry serving seven regions in Ohio and Kentucky, pursuing one Mission to improve the health of our communities, emphasizing people who are poor and underserved. Together, our passion is to make lives better and make healthcare easier.

Our Impact

Communities We Serve

- Mercy Health — Cincinnati
- Mercy Health — Kentucky
- Mercy Health — Lima
- Mercy Health — Lorain
- Mercy Health — Springfield
- Mercy Health — Toledo
- Mercy Health — Youngstown

Serving Through Our Partners

- Akron — Summa Health

Facts & Stats

- Nearly 500 Places to Receive Care
- 23 Hospitals
- 7 Senior Health and Housing Facilities
- 7 Home Health Agencies
- Over 33,500 Employees
- 1,300 Employed Providers
- \$10.1 Billion/Year in Economic Impact in Ohio

In 2017:

- 6.8 Million Patient Encounters
 - \$6.8 Billion Total Assets
 - \$4.7 Billion in Net Operating Revenue
- 

Our Mission In Action

Investing over \$1 million a day

- In 2017, Mercy Health invested \$384 million to benefit the communities where we provide care, most of it targeted to help people who are poor and under-served.
 - \$267 million directly benefited the poor and under-served.
 - \$80 million went to benefit the broader community.

CarePATH Overview

CarePATH is Mercy Health's branding of Epic

CarePATH is a comprehensive, safety-oriented, patient-centered clinical information system using Epic information technology.

The "PATH" in CarePATH is: Patient-centered Access to Team-based Healthcare

Informatics Governance Structure

- Build is governed by the clinically led CarePATH Informatics Committees
- Recommendations for system changes come from the end users and are vetted with the respective system committees
- Inpatient Informatics is co-chaired by two providers (medical and surgical) and two nurse leaders
- Ambulatory Informatics is co-chaired by both providers and a RN
- Currently have 15 certified Physician Builders, including two from our Connect partner and three working to certify

Recent Accolades

2018 HIMSS Davies Award Recipient

HIMSS Stage 7 Certifications

- All Mercy Ambulatory Practices
- 7 Acute Care facilities

Most Wired Advanced Winner

System Uptime Recognition from Epic

Epic Summa Cum Laude for Honor Roll

Flowsheet Charging for Bedside Procedures

Background

- **Bedside procedures** are inpatient procedures that fall outside the scope of routine services included within the inpatient room and board rate¹
- Historically, it has been ambiguous whether organizations could charge for bedside procedures in addition to the room and board rate, but in the last several years, CMS provided guidance that charges should be uniformly applied to both inpatients and outpatients²
- Capturing bedside procedure charges became a revenue cycle operations initiative in late 2016

¹ CMS, *Provider Reimbursement Manual*, Part I, Section 2202.8, 2018.

² CMS, *Provider Reimbursement Manual*, Part I, Section 2202.4, 2018.

Problem: Workflow

- Initially, bedside procedures were accessed from the Charge Capture navigator, a separate section from the Flowsheets activity where most clinical documentation took place
 - Having charging and clinical documentation in separate sections of the chart resulted in a cumbersome workflow that led to missed opportunities to capture charges for billable services performed
 - Nursing leadership provided feedback that they were struggling to operationalize charging for bedside procedures
- 

Problem: Missed Revenue

- Revenue cycle operations inferred that we were leaving missed revenue on the table
 - Charge volumes for bedside procedures were lower than expected compared to the census at each of our acute care facilities
- Believed that simplifying the charge capture workflow would lead to:
 - An increase in gross revenue
 - Improvements in productivity reporting for nursing units
 - A more accurate accounting of the cost of care for each of our patients

Opportunity

- Both revenue cycle leadership and clinical leadership recognized the need for a more streamlined workflow
- While providing patient care will always be the priority for our nurses, capturing revenue enables Mercy Health to fulfill its mission to improve the health of our communities with emphasis on the poor and under-served
- CarePATH continuously looks for opportunities to improve efficiency
 - We believed we could streamline the workflow so that clinicians could capture missed revenue while still prioritizing patient care

Design

- Hypothesis: If we embed charge capture within the flowsheet rows where clinicians are spending most of their documentation time, they will be more likely to capture charges
- The CarePATH Orders, ClinDoc, and Hospital Billing teams worked with Revenue Cycle Operations to develop a flowsheet charging workflow
- The charge rows appear within the flowsheet where the documentation of the procedure takes place

Process

- We implemented flowsheet row charging in two phases:
 - Phase 1 included 22 of the most commonly performed bedside procedures that were less complex to create (July 2017)
 - Phase 2 introduced an additional 12 flowsheet charge rows (September 2017)
 - Collaborated with nursing leaders to determine where to incorporate chargeable flowsheet rows
 - Built the flowsheets rows to be shared by all Mercy Health sites
 - Reorganized the Charge Capture navigator into 4 standard folders
 - Our goal was to make the Charge Capture section more intuitive and help eliminate missed revenue
- 

Flowsheet Row Charges Added Phase 1

- Arterial line placement
 - Chest tube insertion
 - Gastrostomy
 - Central line insertion
 - Intraosseous line intubation emergent
 - Disposable NPWT \leq 50 sq. cm
 - Disposable NPWT $>$ 50 sq. cm
 - Standard NPWT \leq 50 sq. cm
 - Standard NPWT $>$ 50 sq. cm
 - Cystostomy tube change
 - Temporary external pacing
 - Continuous bladder irrigation
 - Bladder scan
 - Blood draw from central line
 - Cath urethra simple- Foley
 - Cath urethra straight
 - Aspiration bone marrow
 - Biopsy bone marrow
 - Lumbar puncture diagnostic
 - Paracentesis
 - Phlebotomy therapeutic
 - Thoracentesis without imaging
- 

Flowsheet Row Charges Added Phase 2

- Incision and drainage, simple
 - Small joint injection or aspiration
 - Medium joint injection or aspiration
 - Injection/aspiration major joint or bursa
 - Halo
 - Trach change
 - Pericardiocentesis initial
 - Pericardiocentesis subsequent
 - Temp pacer insertion
 - Aortic assist device
 - Cardioversion
 - Insert Swan-Ganz catheter (pulmonary artery)
 - Blood draw per port
- 

Design: Charge Row Embedded in Workflow

The screenshot displays the Epic Hyperspace interface for patient Betty Beagle. The main window shows the 'IV Assessment' flowsheet. The left sidebar contains a navigation menu with options like 'Snapshot', 'Summary', 'Chart Review', 'Synopsis', 'Results Review', 'Review Flows...', 'History', 'Notes', 'Demographics', 'Medications', 'Allergies', 'Manage Orders', 'Order Review', 'Immunizations', 'MAR', 'Intake/Output', 'Flowsheets', and 'Work List'. The main content area is divided into sections: 'Specimen Collection Status', 'Lines, Drains, Airways', and 'Arterial Line 02/26/18'. Each section contains a table with columns for 'Admission (Current) fr...', '1336', and a search icon. Red arrows point to specific rows: 'Blood Specimen Collection', '\$ Blood draw via central', '\$ Blood draw per port', and '\$ Arterial line insertion'. The bottom right corner of the interface includes the copyright notice: '© 2018 Epic Systems Corporation. Used with permission.'

Design: Procedural Charges Group

The screenshot displays the Epic Flowsheets interface for a patient's 'Daily Cares/Safety' chart. The interface includes a top toolbar with various actions like 'File', 'Add Rows', and 'Data Validate'. Below the toolbar, there are tabs for different care categories, with 'Daily Cares/Safety' selected. A left-hand pane lists various care items, many of which are checked. The main area shows a table of charges. A red box highlights the 'Procedural Charges- CHARGE ON PERFORM' group. Below this group, several procedural codes are listed, including '\$ Bone Marrow Biopsy and Aspiration' and '\$ Aspiration bone marrow'. The table also shows a total charge of 1344 for the current admission starting on 7/16/18.

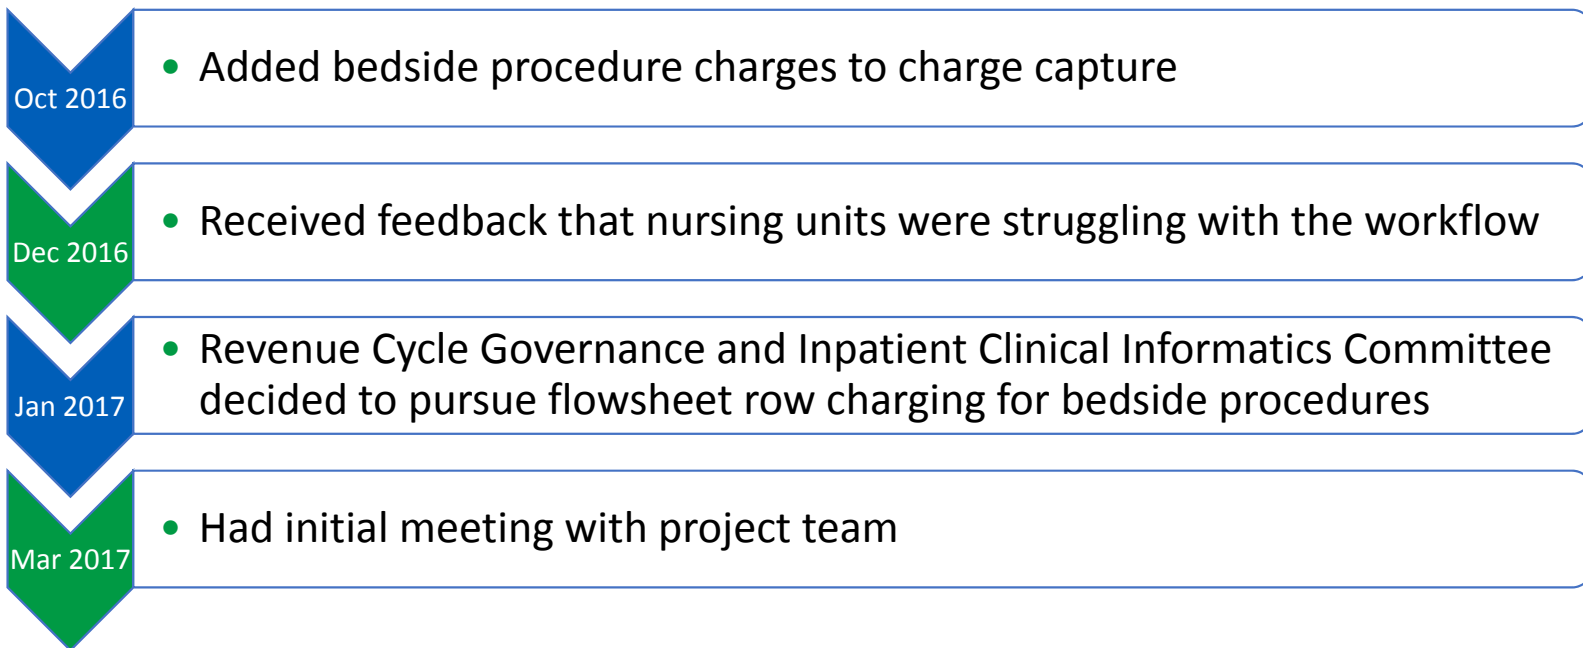

Charge Description	Amount
Admission (Current) fr...	7/16/18
Procedural Charges- CHARGE ON PERFORM	1344
\$ Bone Marrow Biopsy and Aspiration	
\$ Aspiration bone marrow	
\$ Biopsy bone marrow	
\$ Lumbar puncture diagnostic	
\$ Paracentesis w/o imaging	
\$ Phlebotomy therapeutic	
\$ Thoracentesis w/o imaging	
\$ Cardioversion	
\$ I&D Simple	
\$ Small Joint Inj and/or Aspiration	
\$ Medium Joint Inj and/or Aspiration	
\$ Inj/Asp Major Joint or Bursa	
\$ Pericardiocentesis Initial	
\$ Pericardiocentesis Subsequent	
\$ Temporary Pacer Insertion	
\$ Removal Aortic Assist Device

Timeline

Timeline

Training

- Because the change in workflow was relatively simple, we did not use formal training
- We created a tip sheet that outlined how to access each chargeable flowsheet row
- Communicated this workflow change in multiple forums: CarePATH e-News letter, site specialists, nursing leadership meetings, revenue cycle operations meetings

Monitoring Flowsheet Charging

Used reporting to compare charges from baseline:

- By Market
- By Hospital

Developed a “mis-match” report to identify missed charging opportunities

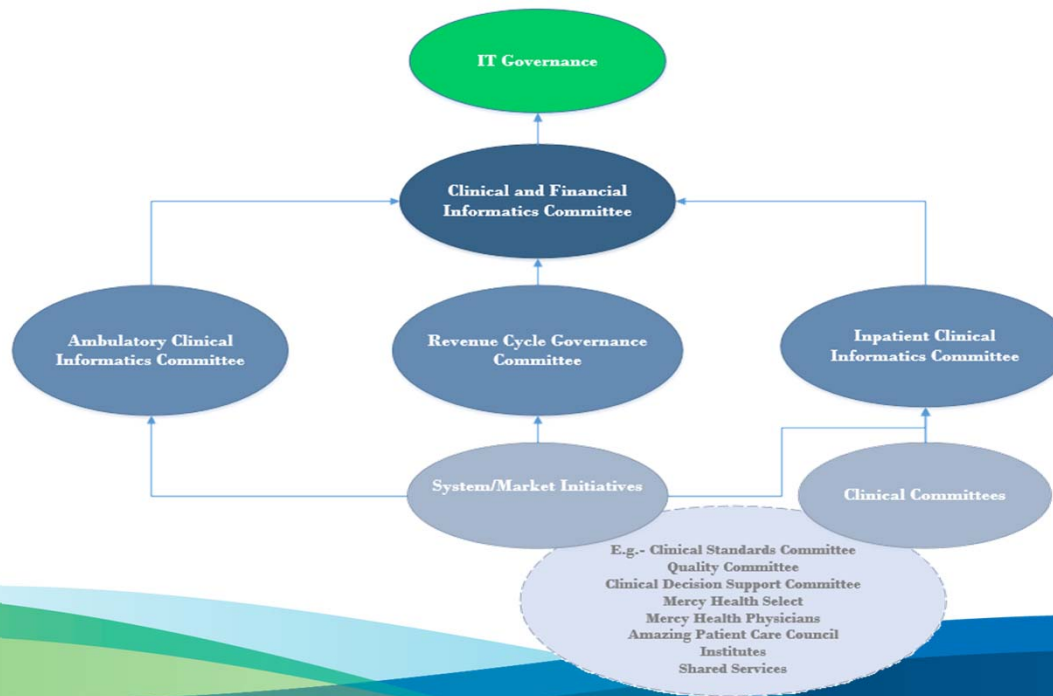

- The MH IP Nursing Procedures Without Associated Charges was designed to capture discrete pieces of nursing documentation and evaluate whether or not a charge was captured
 - If the report finds that a charge has been missed, it returns the documentation information for further evaluation and potential charge entry
-

Governance

Mercy's Revenue Cycle Governance and Inpatient Clinical Informatics Committee work together to guide decisions on flowsheet row charging

Return on Investment

- Baseline period June-July 2017
 - Number of charges: 978
 - Dollars charged: \$379, 082.70
- 1 month post implementation
 - Number of charges: 3092
 - 216% increase from baseline
 - Dollars charged: \$1,102,066.00
 - 190% increase from baseline
- 1 year post implementation
 - Average number of charges: 3630 per month
 - Average dollars charged: \$1,389,781.89

Qualitative Outcome

“This has been a great opportunity to automate processes for our nurses so they can spend more time at the bedside caring for the needs of the patients. Not only were we able to make the process more efficient for our nurses but we positively impacted our revenue for the ministry.”

- Jodi Pahl, Chief Nursing Executive Northern Markets, Mercy Health

Overview of Cost

- Capital Expense
 - None
- Operational Expense
 - Analyst hours:
 - Phase 1 170 hours
 - Phase 2 110 hours
- Our team is becoming more efficient at implementing flowsheet row charging, suggesting that we will be able to scale this functionality out at increasingly lower cost

Next Steps & Lessons Learned

- CarePATH is collaborating with revenue cycle operations to implement flowsheet charging for new service lines
 - All Respiratory Therapy departments across Mercy Health will go live with flowsheet charging on September 22, 2018
 - Outpatient Therapy departments have expressed interest; date TBD
 - We are working to expand the scope of the “Mis-Match” report to identify missed charging opportunities
 - Communication and education are vital to the success of the new workflow
 - Flowsheet charging was a unique opportunity for clinical and revenue cycle teams to work together to achieve a common goal
- 

Thank you.
